Forthcoming 2nd Call for KA2 Partnerships in 2020

The European Commission has informed the ERASMUS+ National Agencies for two additional Thematic Calls for Proposals, within the framework of Key Action 2 (KA201, KA202, KA203, KA204), in 2020. The two Calls, are expected to be officially announced by the end of August 2020, with a deadline in October (the exact date has not yet been announced).

More information and updates will follow in the next Newsletters.

Germany's Council of the EU presidency will focus on Europe's recovery, promoting:

- Education as a driver of the EU GreenDeal
- Digital Education with the upcoming DEAP
- Cooperation in VET
- The EU Skills Agenda for life-long learning

L-Cloud Course and Certification Programme

L-Cloud online course

The L-Cloud project has completed its main output work producing tools and methods to help teachers and future managers to be adaptable to new technologies and managing a school under cloud computing. A webinar is developed addressing the need of open and innovative practices under Cloud for the development of adaptive cloud education leaders. The course can easily be used by all Educational Systems in Europe as its online part is made available and open to be used freely.

If you are interested to attend the L-Cloud Webinar course [click HERE](#)

L-Cloud Certification for "Adaptable Cloud Education Leaders"

The L-Cloud project partners have the pleasure to announce that the Professional Certification Programme has been successfully launched. The development of this innovative International Professional Certification Programme for Cloud Education Leaders, was one of the main objectives of the L-Cloud project, aiming to concretise the criteria and procedures to evaluate the acquisition of the competences by teachers and educational managers. The Certification is granted by the European Association of Career Guidance.

"METIS: Micro Electronics Training, Industry and Skills"

EACG is one of the partners in a 4-year KA2 project: Cooperation for innovation and the exchange of good practices - Sector Skills Alliances, with the title "METIS".

Microelectronics are the brains of all modern services and products. With incredible processing power, they enable billions of computations per second and store vast data. Artificial Intelligence, smartphones, computers, cloud storage, automobiles, space travel and medical equipment all rely on microelectronics.

METIS' key novelty is that for the first time an industry association serving the electronics supply chain, takes the lead to connect the world of VET and industry in Europe.

METIS embodies EU excellence in microelectronics, with 20 partners from 14 countries representing industry (Start-Ups, SMEs, Large Firms), national and EU industry associations, formal educational providers and regulatory bodies in the field of accreditation and certification.

[Read more](#)

Within the activities of the project, there is an online survey with objective to develop the microelectronics sector skills strategy to support the objectives of the established growth strategy for the sector. In WP2, partners will identify the major trends affecting jobs and skills needs in the sector.

We welcome your valuable help to this [ONLINE SURVEY](#)
